

GET THE PERFECT TAN  
IN ONLY 10 MINUTES!

THE COLOUR OF  
*Desire*  
HEALTHY • VIBRANT • ALIVE

*LuscTan*  
Airbrush Tanning Specialist

### The perfect tan in only 10 minutes!

Your Airbrush Tan will be professionally applied by our Airbrush Tanning Specialist, using one of our world leading tanning solutions. The complete tanning process only takes about 10 minutes. You will immediately notice a natural looking tan that will continue to develop for the next 3-6 hours depending on your skin type and what solution was applied.

### Long lasting, quality results.

LuxTan gives you an amazingly natural looking tan, that is comparable or even superior to the results you would achieve from sun or solarium exposure. Now that your Airbrush Tan has been applied, you can expect it to last from 7-10 days depending on your skin type and providing you follow the BEFORE & AFTER tanning instructions listed below.

### Before your tanning session.

To ensure that you receive maximum benefit from your Airbrush Tanning Session, it's very important that you exfoliate your body using the SunFX Body Polish prior to application. For best results, simply place a small amount of SunFX Body Polish on an exfoliating glove (or damp wash cloth). Rub firmly over your skin when showering. Pay particular attention to any rough areas like knees, elbows, ankles and the tops of your feet and toes. DO NOT apply any moisturizer, make-up or perfumes to your skin prior to getting your Airbrush Tanning Session as this will reduce the effectiveness of the procedure.

### What to wear?

Make sure to wear suitable tanning attire to your appointment. We suggest a dark bikini for women and dark underwear or swimming trunks for men. We also recommend that you wear dark, loose fitting clothing after your Airbrush Tanning Session. Minor rub off can occur, and while this will easily wash out of most fabrics, some lighter coloured materials (including leather) may stain.

### After your tanning session.

Once your tan is applied you must let it dry completely. Our Airbrush Tanning Specialist will ensure that your application is dry before you leave, but as a precaution, do not wet your skin for at least 2-3 hours after the tanning session. Showering the following morning is the best option. We recommend that you DO NOT exercise or perspire heavily between the tanning and showering phase. When showering, do not be concerned if some of the initial bronzer washes off. This is part of the tanning process and your skin will continue to tan.

### Extend your tan.

Applying the SunFX Tan Extender twice a day after showering will reduce the rate at which your skin exfoliates keeping your tan looking better for longer. Avoiding long baths, spas and extended swimming sessions will also help prolong the life of your Airbrush Tan. And you should, of course, avoid any products that exfoliate your skin.

### Important!

- **Sensitive Skin:** If you feel you have highly sensitive skin, or you have any doubts at all, we recommend a small localised test spray to check your skin compatibility before having your first Airbrush Tanning Session.
- **Sunscreen:** The Airbrush Tan DOES NOT contain sunscreen so please make sure you apply sunscreen to prevent sunburn when outdoors.
